PLOTATROT

WHY 'PLOTATROT'

I'm one of those people who are really nervous when they go travelling. I could spend months before the trip to research about the attractions, restaurants and hotels. My friend know I have a thing, they usually leave me at it and put comments after each links I listed in our shared google doc. Now that I was introduced to SQL. This idea popped up real quick, I know it is perfect because it is inspired by ME and created for ME and be used by ME!

WHAT? PLOTATROT

The app let you 'PLOT' your 'A' next travel project(s) by the form of each TROT.

I was naming it after the word 'globe-trotter', the main purpose was for it to sound cool and tell user what it does.

KEY TAKEAWAY FOR DESIGN

-   Trot give an idea of listing DOT by DOT
-   Clear and easier to see, no clutter please

HOW TO? PLOTATROT

1. At homepage, add your next trip
2. Links from each trip let you to planning template for
   a. Places to 'GO'
   b. Places to 'EAT'
   c. Places to 'SLEEP'

   I was thinking another one "Places to 'DO' ", but i don't really do much things on my trips, I want to stay true to myself.

3. Into each activity you can add 'TROT's by name, image url and description

4. Your friend can comment

5. You can delete some that you are not interested
